A BACK SUPPORT CUSHION TO TAKE ANYWHERE

[www.corrigo-design.com](http://www.corrigo-design.com)

The light, soft, adjustable back support is designed to provide gentle pressure relief for your back, making any chair comfortable to sit on.

The key to relief for back pain is to sit upright with your lower back supported in a healthy S shape. Everyone's lumbar height and depth is different so our supports are uniquely designed to support this. Adapting to each body shape, the support cradles the entire back in just the right places.

Recommended by Physiotherapists and Osteopaths. The Corrigo back support has been ergonomically designed and is tailor made in Britain.

## Alleviate and prevent pain and tension build up

Our large support includes both a lumbar and thoracic adjustable cushion to alleviate pain and tension for the whole of your back.

Our travel version provides vital lower back support, whilst being small and light enough to take anywhere.

For complete  
back support

Travel Version

The back support adapts around your own body's requirements to ensure your whole spine is supported in a healthy S-shape

Our back supports are designed to assist anyone who wants to reduce or prevent back pain. The soft memory foam support can be inflated to provide pressure relief that adapts to suit your own body's shape.

Particularly suitable to people requiring gentle support whilst sitting, the Corrigo Back Vitality can be used to adapt any work chair, dining chair, sofa, or even used when out at a restaurant and travelling.

Everyone's back is different, so the unique self-inflatable cushions are designed to fit and support the different contours of your own back shape.

Also available in black leather.

- Press the top button to inflate or deflate upper back support
- Press the bottom button to inflate or deflate the lumbar/lower back curve support
- Come slightly forward, away from the cushion, to let the air in when pressing the button to inflate
- Press against the back rest when pushing the button to deflate
- Inflate or deflate the support according to comfort levels

#### HELPFUL TIP

A quick way to let the air out of both cushions, when folding it away into a bag, is to lean or sit on the cushion when pressing in the buttons.

The straps adjust to fit around any chair, including car seats, office chairs, office chairs and dining chairs. For comfort on-the-go and at home.

Secure the straps crossways or straight across the back of the chair and tighten to secure it in place.

### CARE INSTRUCTIONS

To clean, use a damp clean cloth

### TO INCREASE DEPTH OF SUPPORT

You can request an extra foam to insert inside the cover. This can be done without the need to remove it, simply unzip the zip and gently place the foam support inside.

### DO NOT REMOVE COVER

This will cause parts to break and stop the backrest from functioning properly.
